To Whom It May Concern:

My name is Constance Prodromou and I am a licensed acupuncturist in Northern California. I am beginning my 6th year of practice specializing in acupuncture and other energetic techniques such as Neuromodulation Technique at the above address.

I have used NMT as taught in the seminars successfully in many cases including neck pain, low back pain, sciatic pain, allergies to foods, animals and environmental sources, acute and chronic illnesses and asthma. I have also used NMT to relieve the pain of fibromyalgia and the many symptoms of Chronic Fatigue.

In my experience, NMT as taught by use of the NMT seminar manual is the most effective and powerful tool I have in my practice. Without a doubt, the system works as disclosed. NMT is very useful in treating both patients who have a specific known ailment such as pain or allergies but also for patients who have many symptoms that can't always be sorted out in the beginning such as autoimmune diseases. NMT as taught in the seminar can be very useful in restoring energetic balance and therefore resolving symptoms in many patients who are committed to improving their health.

One of my most interesting cases was a young woman of 42 years who was diagnosed by her endocrinologist as having Graves Disease. From the very beginning she informed him that she preferred to use a more natural approach instead of drugs and was going to try NMT. He scoffed at the idea but agreed to monitor her during this time. She began treatment with me in June of 2004. After weekly visits she was retested in November and found that her thyroid antibodies had dropped from 90 to 40, still high but going down. Her TSH increased to normal levels and her T-3 and T-4 were in the normal range, all improvements from her initial testing in April 2004. Her energy was improved, her heart palpitations were greatly reduced if not gone and her weight is returning to normal after being hypothyroid during the summer. When she returned to her endocrinologist in November, he remarked that he didn't know how NMT worked but it obviously made a difference. In fact so much of a difference that he released her from care and said that she only needed to see him again if her symptoms worsened. Needless to say the patient is thrilled!

By far NMT is one of the most powerful improvements in my practice and I look forward to its growth and acceptance in the world of healing.

Sincerely,

Constance Prodromou, L.Ac
